Software Engineer - Full Stack Development

Company: TechFlow Solutions
Location: Remote/Hybrid
Experience: 2–5 years
Salary: $80,000 – $120,000

About TechFlow Solutions

We're a fast-growing SaaS company building next-generation business automation tools. Our platform serves 10,000+ customers worldwide.

Role Overview

We're seeking a talented Software Engineer to join our engineering team. You'll work on our core platform using modern technologies and help scale our systems to millions of users.

Required Skills

• **Programming Languages:** Python, JavaScript, TypeScript

• **Frameworks:** React, Node.js, FastAPI or Django

• **Databases:** PostgreSQL, MongoDB

• **Cloud Platforms:** AWS or Azure

• **Tools:** Git, Docker, CI/CD pipelines

• **Experience:** 2+ years in full-stack development

Preferred Skills

• Experience with LangChain or AI/ML libraries

• Kubernetes and container orchestration

• GraphQL and API design

• Agile/Scrum methodologies

• Startup or high-growth company experience

Responsibilities

- Develop and maintain full-stack web applications

- Design and implement RESTful APIs

- Collaborate with product team on new features

- Write clean, testable, and maintainable code

- Participate in code reviews and technical discussions

- Help scale systems for growing user base

What We Offer

- Competitive salary and equity package

- Comprehensive health, dental, and vision insurance

- Flexible work arrangements (remote/hybrid)

- Professional development budget ($2,000/year)

- Latest MacBook Pro and equipment

- Unlimited PTO policy
